

Spring is the time of year in which individuals and families clean out their closets, garages, and storage areas. For many of us this began at childhood, filtering through which toys we no longer needed and then gradually progressed into adulthood realizing that we had accumulated two lawnmowers, nine pair of identical khaki pants, and twenty-five baseball hats.

Just as Thanksgiving is the annual event to celebrate the relational blessings in our lives, Spring Cleaning is the time of year that we realize how materially blessed we have been. We have a choice to either continue allowing our 'stuff' to accumulate or we can allow someone else to benefit from the things that would otherwise collect dust.

"Spring Cleaning" 2007

Medical Supply and Equipment Donation Event for Aid Throughout the World

Above: A pharmacy in a Kenyan orphanage.

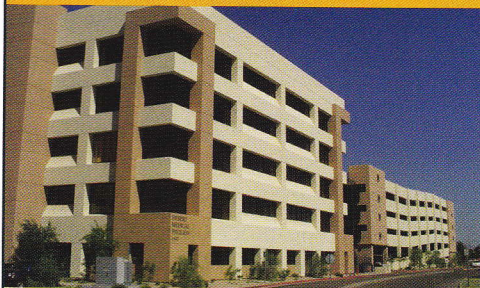

Imagine facing surgery with no anesthesia, no oxygen, no laboratory, no monitors, no ventilators and no EKG. Imagine your hospital reusing gloves, needles, bandages, and sutures. Imagine a premature newborn laying in a worn out incubator that can barely keep the baby warm and alive.

Hope for this sad reality comes in the form of thousands of pounds of new, surplus and overstock supplies and equipment donated from American medical facilities. With facilities in six U.S. cities and deliveries worth more than \$43 million annually, Project C.U.R.E. is the world's largest distributor of donated medical equipment and supplies.

“Imagine facing surgery with no anesthesia, no oxygen, no laboratory, no monitors, no ventilators and no EKG. Imagine your hospital reusing gloves, needles, bandages and sutures.”

Since 1987 Project C.U.R.E. has delivered life saving supplies and equipment to more than 100 countries around the world.

Spring Cleaning 2007 is a collaborative effort led by the Maricopa County Medical Society, Project C.U.R.E. and Medical Office Brokers with the purpose of procuring overstock medical supplies and equipment and delivering it to the most desperately ill and needy people. Specifically, we'd like all healthcare providers in Maricopa County to open their closets, garages, storage areas and exam rooms to see if they are able to donate anything that may be remotely helpful to those in developing nations.
